FOR HOSPITAL DIRECTORS

See every unit’s filter status without calling AFC for a spreadsheet.

AFC Hospital Portal — your hospital, live, read-only.

On schedule · Due soon · Overdue · Scan the same sticker AFC uses

Advanced Filtration Concepts · 323.832.8316

What changes for you

Today

▸ Last service date lives in a binder, a spreadsheet, or somebody’s head.

▸ Overdue units surface when someone walks the penthouse — or after a complaint.

▸ A meeting means calling AFC and waiting on a list.

▸ Your floor staff cannot look a unit up themselves.

With the portal

▸ Every AHU shows last serviced, next due, and on-schedule / due / overdue.

▸ Home counts the hospital. Needs-attention is the list for this week.

▸ Graphs export to PDF for the meeting. Counts, not dollars.

▸ Your staff scan the same sticker. They see status. They cannot edit it.

What you are getting

Your hospital only

The login is bound to one facility. There is no hospital picker.

Live unit status

AHU, building, location, last serviced, next due, green / amber / red.

Scan on the floor

Phone camera on the AHU sticker. Same label AFC technicians scan.

Director graphs

Status mix, buildings, completed vs scheduled. Export PDF.

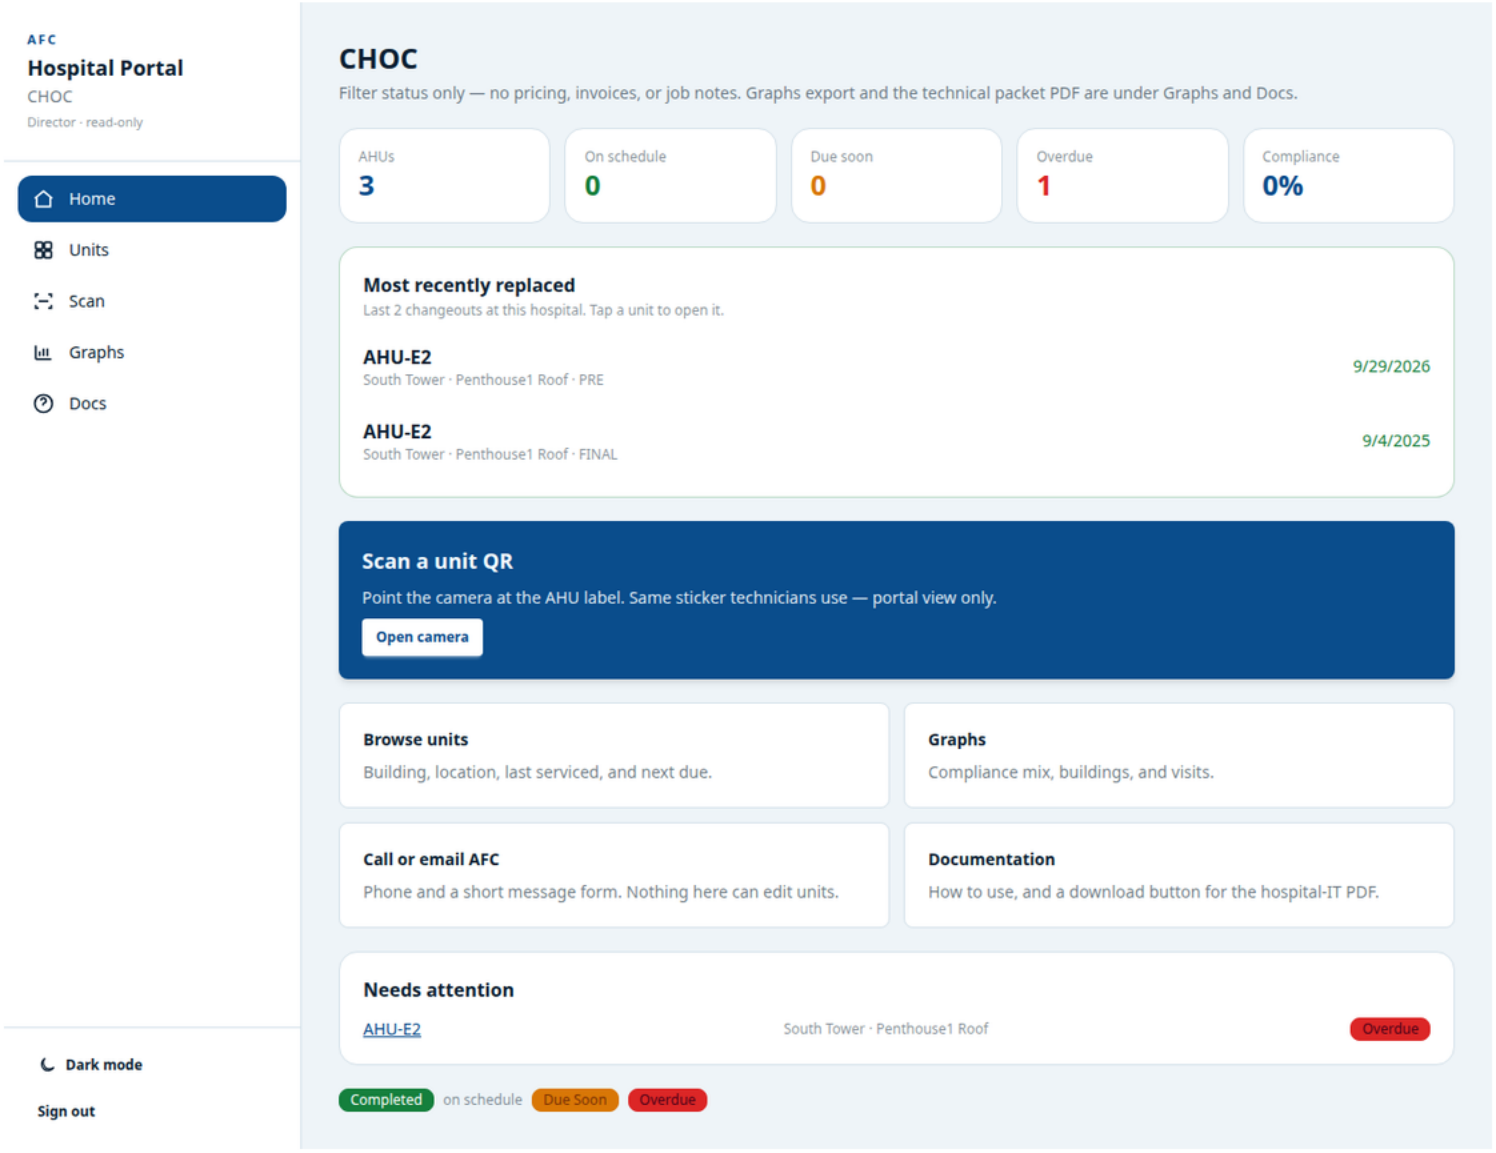

Floor-tech logins

Your people can look units up. No graphs, no prices, no edits.

Read-only on purpose

No catalog, invoices, or job notes. You cannot break the survey.

Your hospital at a glance

Walk up to a unit. Scan it. Know it.

Last serviced / next due

Dates on the unit, not in a binder.

Stage, size, quantity

PRE, FINAL, gas phase — what is in the machine.

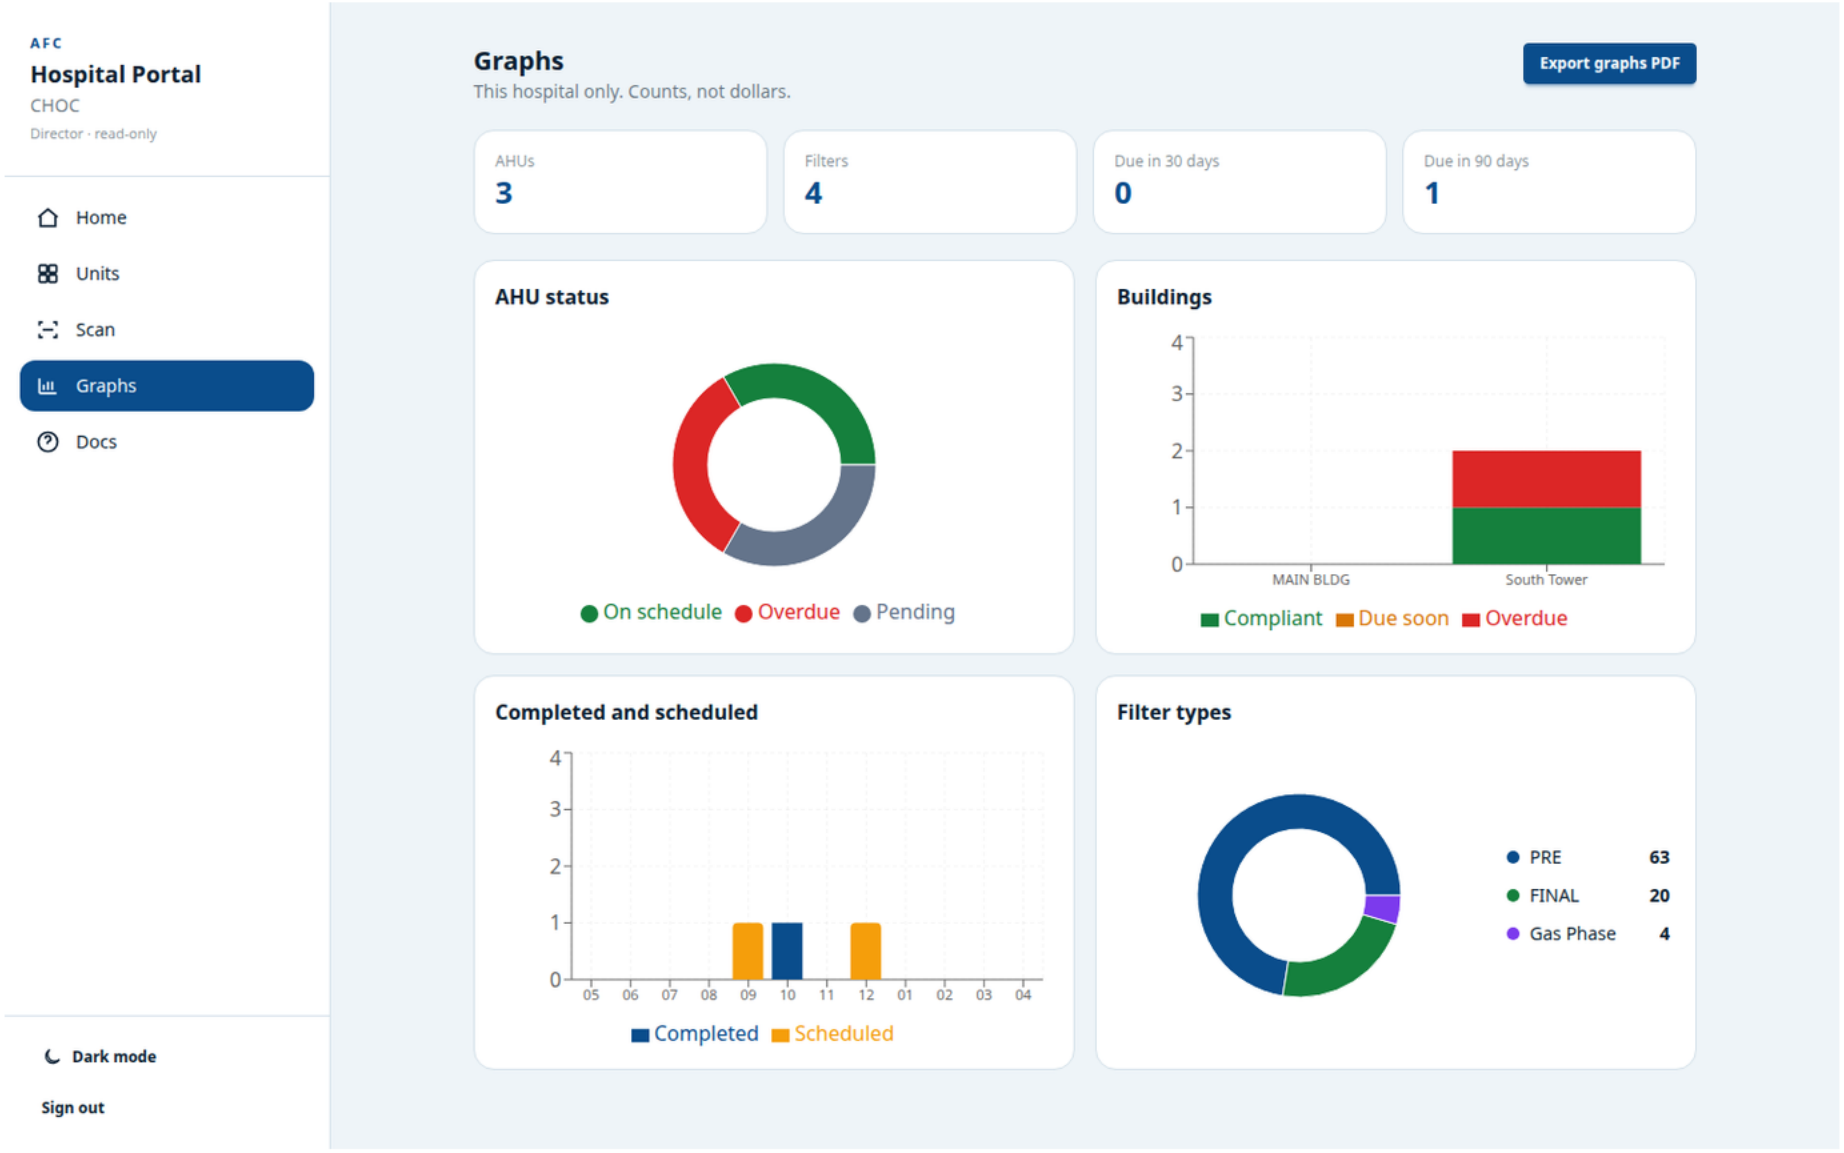

Green, amber, red

On schedule, due soon, or overdue. Instantly.

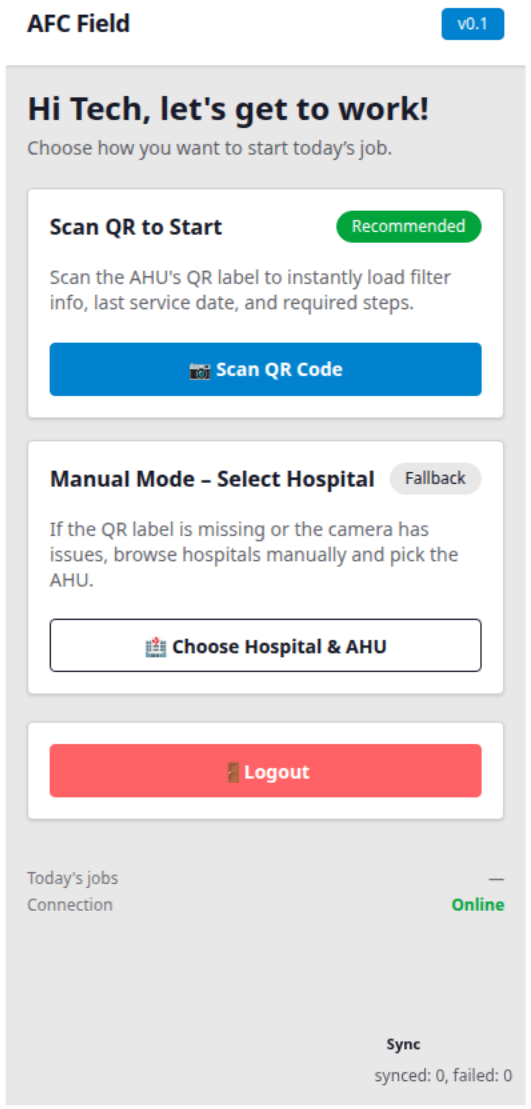

Same sticker AFC uses

You see status. Our tech sees the job. You cannot edit it.

Graphs for the meeting. Counts, not dollars.

What AFC is doing on the roof

AFC Field is our technician app — not yours.

- Our tech scans the same sticker you will scan.
- They see the job: sizes, quantities, last service, what to change.
- When they complete the changeout, last-serviced and next-due update.
- That is what feeds your portal. You do not re-enter it.
- No signal on the roof? They still finish. It uploads when they are back online.

Built so you can look. Not so you can break it.

Read-only

No one at the hospital can edit filters, due dates, or the survey.

No prices

Invoices, POs, and catalog dollars stay with AFC.

Your hospital

A login cannot open another facility.

Two hospital roles

Directors get graphs and the IT packet. Floor techs get units and scan.

Not patient data

AHU names and PM dates. Not an EHR. Not PHI.

IT packet on request

Docs → Download PDF. Voice: 323.832.8316.

You see the status. AFC does the work.

Scan the sticker on the unit.

Open the portal on a phone or a desktop.

Walk into the next meeting with live counts — not a forwarded spreadsheet.
